PERSONAL PROJECTS

DocOps Full Stack Web Application (01/2022 - Present)

- Created a Shared Clinical Platform using JavaScript, ReactJS, Firebase, HTML, CSS
- Documents patients' entire medical health records
- Prescription handling and showcasing patients' electronic health records to aid doctors in faster diagnosis
- Helps patients to set appointments and find doctors near their area and can also interact with them through web texting
- <https://github.com/Hiperultimate/doc-ops>

Axcessor (03/2021 - 05/2021)

- Created a responsive Windows application with UI, which lets the user search for executable files and do web searches directly from the application. Utilized multi-threading to improve performance. Made entirely using Python, Tkinter, Winreg API.
- <https://github.com/Hiperultimate/Axcessor>

Image Reel (04/2021 - 04/2021)

- Build a platform to share images anonymously on the website. Created the entire Back-end operations and image storage through Java JDBC, Servlet, JSP, and SQL.
- <https://github.com/Hiperultimate/Image-Reel>

Personal Portfolio (05/2021 - 06/2021)

- Made my portfolio website with unique animations and layouts using JavaScript, CSS, and HTML to display all my current projects and works. Prototyping and planning are done on Figma.
